DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 9-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malik (6,748,067) in view of Chandrashekhar et al (2003/0140131).

Consider claim 9, Malik teach a method for providing a service, comprising:

A. after receiving a call request for a service from a user terminal, a Service Control Point (SCP) judging whether the user terminal has applied for a prepaid service, if so, executing step B, otherwise directly providing a traditional VPN service for the user terminal (col. 3 lines 30-57); and

B. initiating a service logic, invoking a prepaid service logic by the VPN service logic, and deducting fee from a prepaid account corresponding to the user terminal while providing the service to the user terminal (col. 4 lines 1-8).

Malik disclosed of providing Internet service via prepaid or pay-per-use basis. Malik did not suggest of providing Virtual Private Network (VPN) service. However, Chandrashekhar et al disclosed of providing on demand VPN service that enable subscriber to access to VPN service in an as need basis (see paragraphs 0002 and 0007).

Therefore, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to substitute the teaching of on demand VPN service of Chandrashekhar

et al into the prepaid or pay-per-use Internet services of Malik in order to provide prepaid services into various network environments. The substituting of the Internet services with the VPN services can be easily implemented or recognized by any one of the ordinary skill in the art.

Consider claims 10-11, Malik teaches the claimed features (col. 4 lines 10-24).

Consider claims 12-16, Malik teaches the claimed features (col. 7 lines 4-25).

Consider claims 17-19, Malik teaches the claimed features (col. 7 lines 52-63).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
